

AI that watches every tier of your supply chain. **Live today.**

See supply-chain risk before it costs you.

• app.skansar.com

Every gap is a liability you already own.

The evidence isn't missing. It's disconnected.

Found too late

Problems surface months after they start.

One supplier, five products

It fails, and all five stop.

Scattered records

An audit that should take an afternoon takes three weeks.

We know who we buy from. Below that, we see nothing.

QUALITY ENGINEER • EX-PWC, AEROSPACE MANUFACTURER

AI that finds the risk, and acts on it.

THE MOAT

Holds your audit trail

Replacing us means rebuilding the audit trail

Grows with every supplier

Each supplier serves 5–15 buyers (modelled)

Becomes the standard

Our calculations become the trusted format

Land with mid-size manufacturers. Expand to large ones.

LAND · MID-SIZE MANUFACTURERS

€36K

per year · 2–3 month sales cycle

EXPAND · LARGE MANUFACTURERS

€90K

per year · 6–9 month sales cycle

Day one

value from your own data, no supplier sign-up

3 weeks → 1 afternoon

audit prep (target)

Pricing and sales cycles anchored on Exiger, Assent and Sievo benchmarks; not yet validated by a paying customer.

Engineers who've built at Amazon scale.

18 years of engineering between the founders.

Subhasish Das

CO-FOUNDER • CTO

Distributed systems and secure backends for Amazon's supply chain.

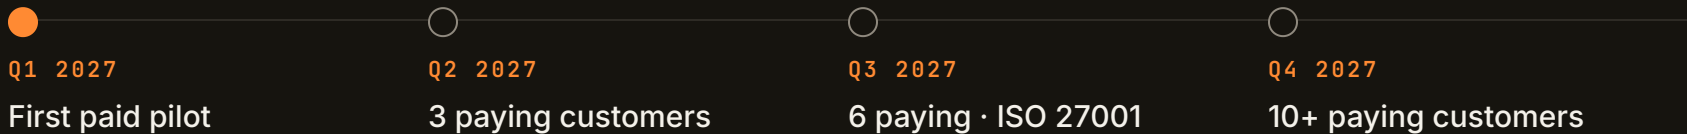

Kalpesh Singh

CO-FOUNDER • CEO

10+ years building enterprise systems alongside Amazon's supply chain.

Raising our first round: €2M
